THIRTY-SIXTH REPORT

TO THE

LEGISLATURE OF MASSACHUSETTS

RELATING TO THE

Registry and Return

OF

BIRTHS, MARRIAGES, AND DEATHS

IN THE

COMMONWEALTH,

FOR THE YEAR ENDING DECEMBER 31, 1877.

PREPARED UNDER DIRECTION OF THE
SECRETARY OF THE COMMONWEALTH.

WITH EDITORIAL REMARKS
BY F. W. DRAPER, M.D.

BOSTON :

Rand, Avery, & Co., Printers to the Commonwealth,

117 FRANKLIN STREET.

1878.

Commonwealth of Massachusetts.

SECRETARY'S DEPARTMENT, BOSTON, Sept. 3, 1878.

To the Honorable Senate and House of Representatives :—

I have the honor, in conformity with the requirements of the General Statutes, to submit herewith the Thirty-sixth Annual Report of the BIRTHS, MARRIAGES, and DEATHS occurring in Massachusetts during the year 1877, and registered and returned by the clerks of the respective cities and towns. Under the act of 1875, the returns of each year may be made to this department as late as the first day of March following; and, owing to the time required for its preparation, the Registration Report has not been distributed to the towns, in the series of Public Documents, until the year next following. Its early publication the present year, earlier than any preceding it, is due to the labors of Dr. FRANK W. DRAPER of Boston, the present editor, and to the industry and application of the clerks in this department to whom the preparation of the many intricate and difficult tables was intrusted: it allows the accompanying Report to be included in the Public Documents of 1877. The public series of documents will hereafter contain the Registration Report of the current year, instead of that of the preceding year.

Respectfully submitted.

HENRY B. PEIRCE,

Secretary of the Commonwealth.

APPENDIX.

LAWS relating to Registry and Returns of Births, Marriages, and Deaths in Massachusetts	clii
relating to Marriage in Massachusetts	clv
CLASSIFICATION OF DISEASES, as adopted in the Registration of Massachusetts	clx

THIRTY-SIXTH REGISTRATION REPORT.

(1877.)

DURING the year 1877, the registration officers of Massachusetts made a record of the essential facts concerning 41,850 births, 12,758 marriages, and 31,342 deaths. The aggregate of this registry is 85,950, a number 2,134 less than the total for the previous year.

Making further comparison with the vital statistics of 1876, we find that in 1877 the number of registered births was smaller by 299; the number of registered marriages was greater by 9; the number of registered deaths was smaller by 1,844.

This considerable decrease in the number of deaths is evidence of the satisfactory condition of the public health in Massachusetts in 1877.

The natural increase of population, or excess of births over deaths, was 10,508, a number greater by 1,542 than the natural increase (8,963) in 1876.

The rates of births, marriages, and deaths in 1877 are as follows:—

Births	.	.	.	24.09	to	1,000	of	estimated	population.
Marriages	.	.	.	7.34		"		"	"
Deaths	.	.	.	18.04		"		"	"

The excess of the birth-rate over the death-rate is 6.05 per 1,000, or .605 per cent.

One living child was born to every 41 of the estimated population, one person in every 68 at all ages was married, and one person in every 55 died.

The following table gives a comparative exhibit of numbers and rates, carried through a series of years:—

TABLE showing the number of BIRTHS, MARRIAGES, and DEATHS registered in Massachusetts during the past twenty-five years, with the Birth-rates and Mortality-rates.

YEARS.	Births.	Marriages.	Deaths.	Excess of Births over Deaths.	Births to 1,000 persons.	Deaths to 1,000 persons.	Excess of Births in 1,000 persons.
1853 . . .	30,920	12,828	20,301	10,619	28·6	18·8	9·8
1854 . . .	31,997	13,683	21,414	10,583	28·9	19·3	9·6

1866 . . .	34,085	14,428	23,637	10,448	26·1	18·1	8·0
1867 . . .	35,062	14,451	22,772	12,290	26·2	16·9	9·3
1868 . . .	36,193	13,856	25,603	10,590	26·2	18·6	7·6
1869 . . .	36,141	14,826	26,054	10,087	25·5	18·4	7·1
1870 . . .	38,259	14,721	27,329	10,930	26·2	18·1	8·1
1871 . . .	39,791	15,746	27,943	11,848	26·6	18·7	7·9
1872 . . .	43,235	16,142	35,019	8,216	28·2	22·9	5·3
1873 . . .	44,481	16,437	33,912	10,569	28·3	21·6	6·7
1874 . . .	45,631	15,564	31,887	13,744	28·3	19·7	8·5
1875 . . .	43,996	13,663	34,978	9,018	26·6	21·1	5·5
1876 . . .	42,149	12,749	33,186	8,963	24·9	19·6	5·3
1877 . . .	41,850	12,758	31,342	10,508	24·1	18·0	6·1

POPULATION.

In accordance with the method pursued in previous years, the estimate of the population of Massachusetts in the middle of the year 1877 is based on the presumption that the mean annual rate of increase during the quinquennial period, 1875-80, is the same as the mean annual rate during the quinquennial period immediately preceding the last census. A certain amount of error inevitably attends any estimate of this kind; but the method here adopted has the advantage that it is substantially founded on an actual enumeration in 1875: it is probably a nearer approximation to the truth than any other computation, or any plan of shrewd guessing, could give.

The average annual rate of increase in the population during the period from 1870 to 1875 was 2.538 per cent. The population of the State in 1875 was found, by the census taken in that year, to be 1,651,912. The estimated population at the middle of the year 1876 was 1,693,837; and the estimated population at the middle of the year 1877 was 1,736,826.

BIRTHS.

The following table shows the number of births annually during the last twenty years:—

YEARS.	Born alive.	Still-born.	TOTAL.	YEARS.	Born alive.	Still-born.	TOTAL.
1858	34,491	747	35,238	1868	36,193	1,050	37,243
1859	35,422	733	36,155	1869	36,141	1,094	37,235
1860	36,051	1,062	37,113	1870	38,259	1,019	39,278
1861	35,445	1,017	36,462	1871	39,791	1,390	41,181
1862	32,275	907	33,182	1872	43,235	1,283	44,518
1863	30,314	903	31,217	1873	44,481	1,246	45,727
1864	30,449	856	31,305	1874	45,631	1,469	47,100
1865	30,249	859	31,108	1875	43,996	1,374	45,370
1866	34,085	1,046	35,131	1876	42,149	1,274	43,423
1867	35,062	1,007	36,069	1877	41,850	1,254	43,104

The whole number of births in 1877 (still-born included) was 43,104, a total nearly the same as that of the previous year.

The *Birth-rate* for 1877 was 24·09 for every thousand of the estimated population, living births only being included. If the still-births are added, the rate is 24·82.

The following table affords an opportunity to compare the birth-rate in 1877 with the average birth-rate for twenty-five years, and with that of each year since 1853:—

YEARS.	Births to 1,000 of Pop- ulation.	YEARS.	Births to 1,000 of Pop- ulation.
1853	28·6	1866	26·1
1854	28·9	1867	26·2
1855	29·0	1868	26·2
1856	30·4	1869	25·5
1857	30·1	1870	26·2
1858	28·9	1871	26·6
1859	29·2	1872	28·2
1860	29·3	1873	28·3
1861	28·6	1874	28·3
1862	26·2	1875	26·6
1863	24·2	1876	24·9
1864	24·2	1877	24·1
1865	23·8		
		Average . .	27·1

The birth-rate for the year 1877 is less than that of any of the past twenty-five, except 1865, the last year of the civil war, during which latter period the number and the rate of births were considerably lessened for reasons readily recognized. The diminution for which the present year is remarkable is not so readily accounted for: many births escape registration; but the error from this source is probably constant, and is no greater in 1877 than in 1867: that the financial disturbances of the present period have some effect in reducing the birth-rate is not unlikely.

The following table, copied from the Thirty-ninth Annual Report of the Registrar-General of England, shows the birth-rate in several European countries, and places our Massachusetts statistics of births at a manifest disadvantage. France has often been alluded to in the writings of statisticians as affording in her birth-rate the ground for much solicitude as to the future of her population; and the *apparent* birth-rate of Massachusetts since 1875 is less than that of France.

C O U N T R I E S.	AVERAGE ANNUAL BIRTH-RATES PER 1,000 OF POPULATION IN THE YEARS 1853-76.				
	In the 20 Years 1853-72.	1873.	1874.	1875.	1876.
England and Wales . . .	34.8	35.5	36.2	35.5	36.6
Denmark	31.6	30.7	30.8	31.8	32.5
Sweden	32.0	30.8	30.9	31.0	30.7
Austria	40.2	40.3	40.1	40.4	40.6
Prussia	37.7	39.7	40.1	40.5	40.5
The Netherlands . .	34.3	36.0	36.1	36.3	36.8
France	26.1	26.1	26.2	26.0	26.3

County Birth-rates.—In the next table there is presented the birth-rate in the several counties in 1877 and in each of the previous nine years, together with an average for the whole decade :—

Birth-rates in the Counties. — Ten Years.

YEARS.	Barnstable.	Berkshire.	Bristol.	Dukes and Nantucket.	Essex.	Franklin.	Hampden.	Hampshire.	Middlesex.	Norfolk.	Plymouth.	Suffolk.	Worcester.	Whole State.
1868	21.5	30.2	27.2	11.4	27.3	20.1	31.9	25.7	30.2	19.7	24.5	36.2	29.3	26.2
1869	20.9	21.8	24.1	11.8	23.0	19.8	24.9	21.6	24.5	26.9	21.7	29.1	25.1	25.5
1870	20.4	24.9	26.1	12.5	23.7	19.7	25.1	22.9	27.1	25.2	22.4	31.8	26.0	26.2
1871	21.6	27.5	26.9	13.7	25.5	20.2	28.5	22.4	26.6	25.9	22.4	33.3	27.7	26.6
1872	20.4	25.2	30.7	15.2	30.6	20.7	29.6	24.7	30.1	26.9	22.2	36.0	28.6	28.2
1873	18.8	25.5	32.3	14.0	28.3	22.5	32.2	25.0	31.4	28.1	23.7	37.9	30.1	28.3
1874	21.9	24.7	24.8	15.4	26.0	21.8	27.7	23.4	28.1	24.6	21.9	33.6	27.1	28.3
1875	20.5	24.6	26.2	16.8	25.6	20.0	27.9	23.1	25.5	25.8	21.2	31.7	26.4	26.6
1876	18.9	21.9	23.7	16.2	22.8	18.4	25.1	21.3	24.5	22.9	20.5	30.1	25.3	24.9
1877	18.8	21.4	22.7	18.9	22.9	18.6	23.5	20.1	24.7	23.2	20.1	28.5	23.1	24.1
Average	20.4	20.5	26.5	14.6	25.5	20.2	27.6	23.0	27.3	24.9	22.1	32.8	26.9	26.5

By this table we are enabled to compare the birth-rate in each county, in 1877, with the birth-rate in the same county during the previous nine years, with the average rate in that county during the entire decade, with the average rate of each of the other counties during the same period, and with the rate of the entire State for each year and for the series of ten years. Barnstable, Bristol, Essex, Franklin, Hampden, Hampshire, Middlesex, Norfolk, Plymouth, Suffolk, and Worcester — all the counties, in fact, except Berkshire, Dukes, and Nantucket — were like the State at large, in that each had a birth-rate in 1877 less than its own decennial birth-rate.

The populous counties, — Suffolk, Worcester, Middlesex, Hampden, Bristol, — containing the cities and larger towns, maintain their place as the most prolific in the series, and their mean decennial birth-rates exceed the decennial average rate of the State as a whole; but in 1877 Suffolk and Middlesex were the only counties whose rates exceeded that of the State. The farming counties, more sparsely settled and containing the less prolific elements of the population, are low in the scale of birth-rates when compared with the other counties and with the State at large.

City Birth-rates. — The following table exhibits an estimate of the birth-rates in 1877 in the ten largest cities of Massachusetts, with a comparison with the remainder of the State and with the rates of the entire State: —

CITIES.	Living Births. 1877.	Births to 1,000 of Estimated Population.	Numbers living to one Birth.
Boston	10,494	28·83	34
Lowell	1,333	24·83	40
Worcester	1,414	26·69	37
Cambridge	1,423	27·59	36
Fall River	1,356	26·91	37
Lawrence	1,003	26·65	37
Lynn	731	21·17	47
Springfield	749	22·71	44
Salem	601	22·47	44
New Bedford	505	18·04	55
Ten Cities	19,609	26·77	37
Remainder of the State	22,241	22·14	45
Whole State	41,850	24·09	41

It thus appears that ten cities in Massachusetts, containing in the aggregate 41 per cent of the entire population in 1875, contributed, in 1877, 47 per cent of all the births registered; and that, to every thousand of the people in those cities, four children were born in excess of the number of children born to every thousand inhabitants in the remainder of the State. The excess is greater than was found to exist in 1876.

Seasons.—In the next table, the influence of the seasons on the birth-rate is exhibited:—

M O N T H S.	Births registered in each Month.	Births registered in each Quarter.	Quarterly Percentages of total Births.	Birth-rate per 1,000 living in each Quarter.
January	3,404	} 9,967	23·8	22·96
February	3,127			
March	3,436			
April	3,078	} 9,538	22·8	21·97
May	3,146			
June	3,314			
July	3,735	} 11,266	26·9	25·95
August	3,854			
September	3,677			
October	3,796	} 11,076	26·5	25·51
November	3,607			
December	3,673			
The Year	41,850	41,850	100·	24·09

The month of August appears to have witnessed the greatest number of births in 1877, and the month of April the smallest number. During the last four years, the highest birth-rate has prevailed in the third quarter of the year; for many years previous, the last quarter held the highest place.

The next table carries the comparison through a series of fifteen years, and shows a noteworthy uniformity in the excess of births in the latter half of the year:—

BIRTHS arranged in Periods of Six Months. — *Fifteen Years.*

Y E A R S.							First Six Months.	Last Six Months.	Difference.
1863	14,338	15,952	1,614
1864	14,052	16,366	2,314
1865	14,136	16,113	1,977
1866	15,218	18,867	3,649
1867	15,971	19,091	3,120
1868	16,728	19,465	2,737
1869	16,238	19,903	3,665
1870	18,066	20,393	2,327
1871	18,387	21,404	3,017
1872	19,994	23,241	3,247
1873	20,327	24,154	3,827
1874	21,428	24,203	2,775
1875	20,645	23,351	2,706
1876	20,009	22,140	2,131
1877	19,506	22,344	2,838
Average							17,669	20,466	2,797

In this period of fifteen years, 46·4 per cent of the registered births occurred in the former half of the year, and 53·6 per cent occurred in the latter half.

Sex.—The statistics of births in 1877, in Massachusetts, are in harmony with the universal experience concerning the proportional number of the two sexes, and the excess of males among children born alive and still-born. The constant and nearly uniform majority of male births points clearly to the fact that thereby the relatively greater death-rate of males in adult life is provided for: men are more exposed than women to the casualties and mishaps of life, and that this is the natural order, we have the fact before us as evidence.

The following table shows a comparison of the sexes at birth in the year 1877, and in the previous quarter of a century:—

		1877.	1853-76.
Born alive	{ Males	21,466	445,964
	{ Females	20,375	421,198
	{ Not stated	9	2,096
Males to 100 females	105·3	105·9
Still-born	{ Males	710	13,164
	{ Females	474	8,799
	{ Not stated	70	2,631
Males to 100 females	149·8	149·7
Illegitimate	{ Males	347	3,556
	{ Females	350	3,675
	{ Not stated	—	40
Males to 100 females	90·9	96·8

The following table shows that the counties illustrated, in 1877, in nearly every instance, the fact observed with regard to the State at large, that among living births those of male children predominate:—

BIRTHS. — *Proportion of Males to Females in the Counties.*
1877.

COUNTIES.	Males, per cent.	Females, per cent.	Males to 100 Females.
Barnstable	51·0	49·0	104·3
Berkshire	52·4	47·6	110·4
Bristol	52·2	47·8	109·4
Dukes and Nantucket	48·5	51·5	94·3
Essex	50·6	49·4	102·6
Franklin	47·8	52·2	91·8
Hampden	50·3	49·7	101·5
Hampshire	52·9	47·1	112·6
Middlesex	51·0	49·0	104·2
Norfolk	51·5	48·5	106·2
Plymouth	54·3	45·7	119·0
Suffolk	50·7	49·3	103·0
Worcester	52·3	47·7	109·9
Whole State	51·2	48·8	105·3

Parent-Nativity.—In the following table, we endeavor to classify the births in 1877 in accordance with the nativity of the parents, distinguishing the latter as “native-born” and “foreign-born.” In former years, just subsequent to the remarkable immigration which began in 1850, it was possible to discriminate, with a close approximation to accuracy, between the native or “old Puritan” stock of Massachusetts and that which was then freshly introduced from foreign lands. But, as the years have passed on, the “native-born” element no longer continued to possess its early distinctive characteristics: inevitably and increasingly it received accessions from the exotic class, the adult children of the immigrants of a quarter-century ago having the same right to be denominated “native-born” or “American” as the lineal descendants of the colonial immigrants of two centuries ago. It is necessary to bear this fact in mind when any attempt is made to interpret the statistics here set forth. Each year this difficulty increases; and the time will doubtless arrive presently when American statisticians will recognize the propriety of discontinuing a classification whose value is more plausible than defensible.

If we calculate the percentages of the numbers in the foregoing table for the State at large, and carry the comparison through a series of ten years, we find that under the head "native-born" there is, in 1877, an apparent gain in the percentage at the expense of the parentage denominated "foreign-born," and that there is an approach to the ratio of seven years ago in this native class. The births of foreign parentage are less in proportion to the whole number than in any year since 1860. The births of mixed parentage, which, in most cases, are really births of foreign extraction, are steadily increasing in their percentage.

Percentages of Native-born and Foreign-born Parents of LIVING BIRTHS in each of the past Ten Years in Massachusetts.

YEARS.								Native-born Parents.	Foreign-born Parents.	One Parent foreign-born.
1868	43.05	47.60	9.35
1869	42.07	48.01	9.92
1870	41.01	48.33	10.66
1871	40.17	48.61	11.22
1872	39.45	49.21	11.34
1873	39.98	48.24	11.78
1874	38.89	48.43	12.68
1875	39.87	46.71	13.42
1876	40.64	45.00	14.36
1877	41.17	44.03	14.80

The next table makes the changes just spoken of still more apparent, inasmuch as a long series of years is included in the comparison:—

Percentages of American and Foreign LIVING BIRTHS in the past Twenty-eight Years.

	Average. 1849-53.	Average. 1854-58.	Average. 1859-63.	Average. 1864-68.	Average. 1869-73.	1874.	1875.	1876.	1877.

Plural Births.—In the year 1877, in Massachusetts, four hundred and four (404) women gave birth to eight hundred and fifteen (815) living children. There were three hundred and ninety-eight (398) twin births, five (5) cases of triplets, and one instance of a family of four at a single birth. Two of the triplet births occurred in Essex County; and Suffolk, Plymouth, and Worcester Counties shared the other three. Essex County, besides doing so well in the matter of triplets, has the distinction of a record of four children at one birth; and, for the encouragement of those who observe signs of the rapid decadence of the old Puritan stock, it should be remarked that the parentage of this family group is registered as “American.”

The following table shows the statistics of plural births during the past fifteen years, classified with reference to the nativity of the parents:—

PARENTAGE OF Plural Births. — *Fifteen Years.*

1877 .	304	37.3	416	51.0	95	11.7	—	—	815	100.

The proportion of plural births does not vary greatly from year to year: as is shown in the accompanying table, the rule is, that, including the cases of twins with those of triplets, one plural birth occurs in every one hundred single births:—

PLURAL BIRTHS in Massachusetts. — *Ten Years.*

Y E A R S.	Cases of twins.	Cases of triplets.	Number of living births to one case of twins.	Number of living births to one case of triplets.
1868	352	6	103	6,032
1869	339	6	107	6,023
1870	344	3	111	12,753
1871	362	5	109	7,958
1872	375	3	115	14,412
1873	407	6	109	7,603
1874	400	4	114	11,408
1875	380	3	116	14,665
1876	345	4	122	10,537
1877	398	5	105	8,370
Average	370	4	111	9,976

Illegitimate Births.— There were six hundred and ninety-seven (697) births out of wedlock in Massachusetts in 1877,— a number less by sixteen than the number recorded in 1876. The following table shows that these tokens of immorality have increased in recent years, and it will be remarked that the increase has been in coincidence with a period of stringency in the mercantile and industrial world:—

ILLEGITIMATE BIRTHS registered in Massachusetts. — *Fifteen Years.*

Y E A R S.	CHILDREN BORN OUT OF WEDLOCK.	
	Numbers.	To every 1,000 Births.
1863	277	9·1
1864	285	9·3
1865	271	8·9
1866	281	8·2
1867	292	8·3
1868	366	10·1
1869	286	7·9
1870	285	7·4
1871	432	10·9
1872	303	7·0
1873	587	13·2
1874	648	14·2
1875	632	14·4
1876	713	16·9
1877	697	16·6
Average	404	10·3

In the next table we endeavor to learn from what source illegitimate children can trace their lineage; so far, at least, as their maternal nativity is concerned. Obviously, the limitations to the comparisons here presented in the annual percentages are important: in addition to the indefiniteness pertaining to the terms "American" and "Foreign," as already discussed on another page, we are to remember that a comparison of numbers and percentages is of far less value than a comparison of rates based on the data of population in the two classes, — data which, in the nature of things, we cannot obtain in this connection. It is of little moment that 52·7 per cent of the illegitimate children born in 1863 had native-born mothers, if we do not know how many native-born spinsters of child-bearing age were living in 1863 to supply those 146 unfortunates. It would certainly be unfair to conclude that in 1863 the native-born women of Massachusetts were more immoral than those of foreign birth by as much as 52·7 exceeds 37·6.

1870 . .	154	54·0	111	39·0	20	7·0	285	100·
1871 . .	228	52·8	164	38·0	40	9·2	432	100·
1872 . .	165	54·5	121	39·9	17	5·6	303	100·
1873 . .	306	52·1	269	45·8	12	2·1	587	100·
1874 . .	326	50·3	303	46·8	19	2·9	648	100·
1875 . .	250	39·6	354	56·0	28	4·4	632	100·
1876 . .	377	52·9	270	37·9	66	9·2	713	100·
1877 . .	378	54·2	292	41·9	27	3·9	697	100·

Among the illegitimate births registered in 1877, there were 347 males and 350 females: it has been the usual experience, that, in this class of births, the female children exceed in number the male children.

Of the whole number recorded, the city of Boston contributed 442,—63 per cent of the total. In Boston the ratio of children born out of wedlock to the total number of births was as 42·1 to 1,000: in the rest of the State it was as 8·1 to 1,000.

Still-born.—Of this class, 1,254 were recorded in 1877,—710 males, 474 females, and 70 whose sex was not registered. Of course the registry of these births is very far from complete. The percentage of still-births to living births in 1877 was 2·99, or one still-born to every 33 born alive.

MARRIAGES.

The whole number of marriages whose statistics were placed on record in Massachusetts in 1877 was 12,758. In 1876 the number was 12,749. When the increase in population is regarded, this very slight increase in the number married in 1877 is a suggestive indication of the commercial depression of the period. It is not probable that the registration of marriages is complete; but the error on this score is hardly to be considered as greater in this year than in previous years.

The marriage-rate in 1877, the number of marriages to every thousand of the estimated population, was 7·34; that is to say, of every 100,000 of the people of all ages, 1,468 were married in 1877.

The following table gives the marriage-rate in each of the last thirteen years, a period since the disturbances of matrimonial statistics caused by the civil war:—

Y E A R S.								Marriages.	Persons married to 1,000 living.	Number living to one marriage.
1865	13,052	20·60	97
1866	14,428	22·78	88
1867	14,451	22·82	88
1868	13,856	21·88	91
1869	14,826	23·40	85
1870	14,721	20·20	99
1871	15,746	21·08	95
1872	16,142	21·06	95
1873	16,437	20·92	96
1874	15,564	19·32	103
1875	13,663	16·54	121
1876	12,749	15·06	133
1877	12,758	14·68	136
Average								14,492	20·02	100

It will be observed that the year 1877 is at a decided disadvantage when compared with the remainder of the years in the period selected: the whole number of marriages in 1877 was less by 1,734 than the annual mean of these thirteen years, and the marriage-rate was very low. Even during the period from 1861 to 1865, when the war had a very obvious influence on the marriage-rate by removing from the State many thousands of adult males, the proportion of marriages to the population did not fall so low as in 1877; the number of marriages in 1863, in the midst of the troubles, being as 8·77 to 1,000 of the population, — considerably better, it will be seen, than the 7·34 of the present year. Sooner or later, this marked decline in the statistics of marriages will make itself felt on the birth-rate. A State cannot be considered prosperous whose birth-rate and marriage-rate fall much below a recognized normal standard.

The following table, copied from the Thirty-ninth Annual Report of the Registrar-General of England, affords an opportunity to compare our marriage statistics with those of certain countries in Europe:—

COUNTRIES.	AVERAGE ANNUAL NUMBER MARRIED PER 1,000 POPULATION IN THE YEARS 1853-76.				
	In the 20 years 1853-72.	1873.	1874.	1875.	1876.

Whole State .	11.11	10.17	7.53	7.34	90	99	133	136

City Marriage-rates.—In the next table, the rates of marriages in the large cities of Massachusetts are given for the three years, —1875, 1876, and 1877:—

CITIES.	MARRIAGES TO 1,000 OF POPULATION.			PERSONS LIVING TO ONE MARRIAGE.		
	1875.	1876.	1877.	1875.	1876.	1877.
Boston	9.68	7.98	7.60	103	125	131
Lowell	10.26	7.60	10.22	97	131	97
Worcester . . .	8.45	10.13	7.14	118	98	140
Cambridge . . .	8.24	6.66	6.86	121	150	145
Fall River . . .	9.79	8.20	9.07	102	122	110
Lawrence . . .	10.89	8.91	8.77	92	112	114
Lynn	8.71	9.00	9.79	115	111	102
Springfield . .	9.69	8.19	8.97	109	122	111
Salem	6.78	6.53	6.13	147	153	163
New Bedford . .	10.54	8.95	10.00	95	112	99
Ten cities, average .	9.30	8.12	8.07	110	123	124
Rest of State . . .	7.41	7.09	6.81	135	141	147
Whole State . . .	8.27	7.53	7.34	121	133	136

By the foregoing table it appears that marriages have declined more, in the last three years, in the urban than in the rural portions of Massachusetts. The same fact is illustrated in the table of county marriage-rates.

Season.—The following table exhibits the number of marriages recorded in each month of 1877, with the quarterly aggregates and percentages:—

M O N T H S.	Marriages registered in each Month.	Marriages registered in each Quarter.	Quarterly percentages of total Marriages.
January	1,176	} 2,590	20·32
February	899		
March	515		
April	1,130	} 3,337	26·18
May	1,077		
June	1,130

August	836		
September	1,114		
October	1,313	} 3,952	31·01
November	1,611		
December	1,028		
The year	12,758*	—	100·00

* Including 13 of which the time was not stated.

Almost without exception, the month of November has been preferred by Massachusetts people as the most favorable season for matrimony: the large number of marriages in that month has invariably given the last quarter of the year the chief place.

The month of March in 1877 maintains its accustomed relation as the season deemed least propitious for marriage.

The order of the four quarters in 1877—fourth, second, third, first—corresponds with the experience in England in many years.

The next table exemplifies the constancy of Massachusetts customs in the selection of the wedding season. It gives the quarterly aggregates and percentages during the past decade.

Y E A R S.	1st Quarter.		2d Quarter.		3d Quarter.		4th Quarter.

1877 . . .	2,590	20.32	3,337	26.18	2,866	22.49	3,952	31.01
Average . .	3,237	21.49	3,727	25.45	3,306	22.56	4,464	30.50

Ages. — The next table gives the ages and conjugal condition of persons married in 1877, so far as those facts were mentioned in the returns. The average age of the brides and grooms maintains a remarkable uniformity from year to year: the only change the present year is, that the average age of men marrying for the first time was found to be a very little in advance of that of previous years.

AGES at Marriage of 12,718 MEN and of 12,697 WOMEN.

	Under 20	20 to 25	25 to 30	30 to 35	35 to 40	40 to 45	45 to 50	50 to 55	55 to 60	60 to 65	65 to 70	70 to 75	75 to 80	Over 80
Men . . .	278	4,855	3,854	1,533	824	463	296	201	153	120	74	51	11	5
Women . . .	2,440	5,592	2,529	931	568	258	182	95	51	33	13	4	1	1

AGES at Marriage of 10,494 BACHELORS and of 11,263 MAIDS.

Bachelors . . .	278	4,786	3,596	1,160	420	150	64	23	11	2	2	1	1	1
Maids . . .	2,433	5,457	2,248	645	295	100	48	28	7	2	1	1	1	1

AGES at Marriage of 2,211 WIDOWERS and of 1,421 WIDOWS.

Widowers . . .	-	66	254	371	401	313	232	178	142	118	71	50	10	5
Widows . . .	6	131	278	285	270	158	133	67	44	31	13	4	1	1

The average age of all the men married in 1877 was 29.20
 average age of all the women married in 1877 was 25.24
 average age of men marrying for the first time was 27.94
 average age of women marrying for the first time was 23.77

The annexed table, which gives the mean age of brides and bridegrooms during the past ten years in each of two classes, shows a noteworthy constancy in this regard:—

Y E A R S.	Average age of all Bridegrooms.	Average age of all Brides.	Av'ge age of men marrying for the first time.	Av. age of women marrying for the first time.
1868 . . .	29.0	25.0	26.5	23.6

In 1877 there were 9,915 bachelors in Massachusetts who chose maidens for their wives, and there were 608 bachelors who married widows. Of widowers there were 1,396 who married maids, and 818 who married widows.

The two tables which follow show some noteworthy differences in the respective ages of brides and grooms in 1877 :—

Certain Marriages. — Ages, 1877.

DEATHS.

The registration of deaths affords a measure of the waste, in some measure preventable, which a people suffers in its vitality and potential productiveness. The births and the accessions by immigration represent the repair. It is because mortality touches in a different manner and more keenly individual and social experience* that data of this department of vital statistics have always received more attentive study than has been given to other branches of this work. The public health is interpreted by the death-rate, and sanitary administration is stimulated or is complacently inactive according to the rise and fall of the ratio of deaths to population.

The public health of Massachusetts in 1877, tested by the standard which the registration of deaths thus enables us to establish, was satisfactory. The State was spared the presence and inroad of the destructive diseases which sometimes, as epidemics, make alarming invasions. The total number of deaths recorded was 31,342,—an aggregate less by 1,844 than that of 1876. The mortality was at the rate of 18.04 to every thousand of the living,—a rate less than that of any year since 1870.

For the purpose of observing how the mortality-statistics of 1877 stand in relation to those of former years and to the general mean of many years, the following table is introduced. It should be explained that the low death-rate of the first five years in the series is an approximation only, and not a very close one, to the actual mortality of the State, the registration-law being then in its experimental stage. The death-rate of 1877 is below the mean annual rate of the past thirty-six years, no correction being made for the deficiency above mentioned.

* "If a funeral-train and wedding-procession were to meet unexpectedly, it will readily be allowed that the mirth of the last would be speedily merged in the gloom of the other." — *Sir Walter Scott*.

DEATH-RATE in Massachusetts. — *Thirty-six Years.*

1877	31,342	18.0	
Average .							—	18.4	18.2

The following table, compiled from the statistics published in the Thirty-ninth Annual Report of the Registrar-General of England, enables us to institute a comparison between the mortality-rates of Massachusetts and those of certain European states. Making all necessary allowances for differences in the accuracy of registration and in the race-characteristics of the various nations, we may correctly conclude that the public health of our people is not inferior to that of transatlantic communities.

France . . .	24.4	23.3	21.4	23.1	22.7

County Death-rates. — The death-rates in 1877, and in each of the previous nine years, in the several counties of Massachusetts, are given in the annexed table: —

COUNTY DEATH-RATES, 1868-77.

YEARS.	Barnstable.	Berkshire.	Bristol.	Dukes.	Essex.	Franklin.	Hamden.	Hampshire.	Middlesex.	Nantucket.	Norfolk.	Plymouth.	Suffolk.	Worcester.	Whole State.
1868	14.2	17.0	21.2	16.2	18.6	15.1	21.9	15.9	21.9	16.4	16.4	18.2	24.6	19.3	18.6
1869	15.5	16.9	17.8	11.7	20.3	16.8	21.3	16.6	22.3	21.3	17.7	17.3	24.8	19.4	18.4
1870	14.5	15.4	18.1	18.5	17.4	16.9	19.1	17.1	18.9	22.5	15.6	16.2	23.7	17.9	18.7
1871	16.7	13.0	16.4	17.2	19.1	18.1	20.9	15.5	19.8	22.8	15.8	16.9	22.9	19.6	18.7
1872	17.5	19.0	24.5	22.7	23.1	16.5	25.9	21.0	23.8	20.4	18.9	18.7	31.4	23.1	22.8
1873	17.6	17.1	28.3	15.3	22.1	17.4	24.4	18.1	23.8	25.7	18.7	18.9	30.7	18.9	21.6
1874	16.8	17.5	19.1	21.9	18.2	17.9	18.7	22.0	20.0	27.2	16.9	16.3	22.4	17.0	19.8
1875	19.1	18.9	20.7	17.2	21.1	19.8	20.4	20.4	20.9	26.2	17.4	18.6	25.7	18.4	21.2
1876	18.3	15.9	19.5	16.2	20.5	15.0	18.4	17.5	19.3	32.8	16.9	18.7	22.9	17.5	19.6
1877	16.5	15.1	18.6	18.2	19.3	14.4	16.3	16.2	18.1	49.9	16.7	16.1	19.7	17.0	18.0
Average	16.7	16.6	20.6	20.2	20.0	16.8	20.7	18.0	20.9	26.5	17.1	17.6	24.9	18.8	19.7

The relative order of the counties according to their mortality rates in 1877 is as follows, beginning with the lowest : Franklin, Berkshire, Plymouth, Hampshire, Hampden, Barnstable, Norfolk, Worcester, Middlesex, Dukes, Bristol, Essex, Suffolk, Nantucket.

Their rank, taking the mean of the decennial rates and beginning with the lowest, is as follows : Berkshire, Barnstable, Franklin, Norfolk, Plymouth, Hampshire, Worcester, Essex, Dukes, Bristol, Hampden, Middlesex, Suffolk, Nantucket.

In 1877, six of the counties — Middlesex, Dukes, Bristol, Essex, Suffolk, and Nantucket — had a mortality-rate in excess of that of the State ; in the decennial period, seven of the counties — Essex, Dukes, Bristol, Hampden, Middlesex, Suffolk, and Nantucket — had an average death-rate in excess of that of the State.

These points are made more plain by a statement in tabular form, as follows :—

COUNTY MORTALITY-RATES. — *Relative order.*

	1877.	DECADE, 1868-77.
1	Franklin . .	Berkshire.
2	Berkshire . .	Barnstable.
3	Plymouth . .	Franklin.
4	Hampshire . .	Norfolk.
5	Hampden . .	Plymouth.
6	Barnstable . .	Hampshire.
7	Norfolk . .	Worcester.
8	Worcester . .	THE STATE.
9	THE STATE . .	Essex.
10	Middlesex . .	Dukes.
11	Dukes . .	Bristol.
12	Bristol . .	Hampden.
13	Essex . .	Middlesex.
14	Suffolk . .	Suffolk.
15	Nantucket . .	Nantucket.

For the purpose of avoiding the errors incidental to comparisons such as the counties, with their great diversities in population and territory, afford, — errors which are illustrated in the extreme case of Nantucket, for example, — the registration reports have presented from year to year a comparison of results based upon the statistics of six territorial divisions of the State, with boundaries designed to give a better notion of urban and rural death-rates in Massachusetts than the county divisions could exhibit. These results for 1877 are shown in the accompanying table : —

DEATH-RATE in Six Geographical Divisions 1877.

COUNTIES.	Estimated Population — 1877.	Deaths — 1877.	Deaths to 1,000 living.	No. living to one Death.	Percentages of Population.	Percentage of Deaths.
1. Metropolitan (City of Boston) . . . }	363,940	7,284	20.01	49	20.7	23.2
2. North-Eastern (Essex,) and parts of Suffolk and Middlesex). . }	527,579	9,812	18.59	54	30.4	31.3
3. South-Eastern (Dukes and Nantucket, Barn- stable, Plym'th, Bris- tol, and Norfolk) . }	340,397	6,017	17.68	55	19.9	19.2
4. Midland (Worcester, and part of Middlesex) . }	250,561	4,231	16.88	59	14.4	13.5
5. Valley (Franklin, Hamp- den, and Hampshire) }	182,667	2,913	15.95	63	10.5	9.3
6. Western (Berkshire) .	71,681	1,085	15.14	66	4.1	3.5
Whole State . . .	1,736,826	31,342	18.04	55	100.0	100.0

The descending scale in the death-rates, from the metropolitan maximum, through the various degrees of a more or less rural population to the minimum among the sparsely-settled hills of Berkshire, cannot fail to attract attention in this comparison. What is true here of the large districts of the State appeared equally true in connection with the counties; namely, that the death-rate is highest where the people live most in masses.

In the next table, the comparison of district death-rates is carried through a decade:—

DISTRICT DEATH-RATES, 1868-77.

Y E A R S.	Metropoli- tan.	North- Eastern.	South- Eastern.	Midland.	Valley.	Western.	STATE.
1868 . .	25.0	20.7	18.0	18.9	18.6	17.0	18.6
1869 . .	24.9	21.8	17.9	19.2	18.8	16.9	18.4
1870 . .	24.3	18.3	16.6	17.8	18.1	15.4	18.7
1871 . .	23.5	19.6	16.5	19.1	18.8	13.0	18.7
1872 . .	32.3	23.6	20.7	22.0	22.5	19.0	22.8
1873 . .	31.4	23.4	21.9	18.8	21.1	17.1	21.6
1874 . .	22.8	19.2	17.8	16.8	19.4	17.5	19.8
1875 . .	26.1	20.9	19.2	18.5	20.3	18.9	21.2
1876 . .	23.2	19.8	18.7	17.6	17.5	16.0	19.6
1877 . .	20.0	18.6	17.7	16.9	15.9	15.1	18.0
Average .	25.3	20.6	18.5	18.6	19.0	16.6	19.7

The death-rate of each of the districts in 1877 was less than its mean decennial death-rate. The death-rates of the metropolitan and north-eastern districts, both for the year 1877 and for the decade, exceed the rates for the State at large.

The metropolitan district has the unenviable distinction of presenting the highest death-rate in any single year (32.3 in 1872, the year of the small-pox epidemic), and the highest decennial mean, 25.3. The lowest rate in any single year (13 in 1871), and for the ten years (16.6), falls to the credit of Berkshire County, which constitutes the western district.

City Death-rates.—In the following table the death-rates of the ten largest cities in Massachusetts during the last three years are given. The population upon which the rates are calculated is estimated, except for 1875, the census year. It is obvious that life in cities, as cities are now constituted, is subject to influences more unfavorable to longevity than life in

the country presents. Among the more important factors producing this character in city death-rates is an excess of perishable elements in the population, — the large proportion of infants and young children improvidently and ignorantly reared, the dwellers in crowded tenement-houses, and the masses of the vicious and the idle who gravitate toward populous centres.

CITIES.	DEATHS REGISTERED.			DEATHS TO 1,000 LIVING.		
	1875.	1876.	1877.	1875.	1876.	1877.
Boston	8,925	8,196	7,284	26·2	23·2	20·0
Lowell	1,021	1,147	1,029	20·5	22·2	19·2
Worcester . . .	1,030	1,046	1,063	20·9	22·0	20·1
Cambridge . . .	1,115	964	972	23·3	20·5	18·8
Fall River . . .	1,088	1,025	1,058	24·0	22·0	21·0
Lawrence	906	796	831	26·0	23·3	22·1
Lynn	627	661	656	19·2	21·4	19·0
Springfield . . .	650	609	498	20·9	19·7	15·1
Salem	595	617	553	22·9	23·6	20·7
New Bedford . . .	562	512	525	21·7	19·0	18·7
Ten Cities	16,519	15,573	14,469	24·1	21·9	19·7
Rest of State . . .	18,459	17,613	16,873	19·8	17·9	16·8
Whole State . . .	34,978	33,186	31,342	21·2	19·6	18·0

It will be remarked that the death-rates in 1877 show a decided decline as compared with those of the two previous years: the cities shared with the country a gratifying immunity from destructive disease.

Seasons.—The following table presents a demonstration of the influence of the seasons upon mortality in Massachusetts in 1877:—

	Deaths registered in each Month.	Deaths registered in each Quarter.	Quarterly Per- centage of Total Mortality.	Death-rate per 1,000 living in each Quarter.
January	2,641	7,634	24·36	17·58
February	2,298			
March	2,695			
April	2,541	6,948	22·17	16·00
May	2,355			
June	2,052			
July	2,915	9,321	29·74	21·47
August	3,347			
September	3,059			
October	2,680	7,439	23·73	17·13
November	2,394			
December	2,365			
The Year	31,342	31,342	100·00	18·04

The months are in the following order with reference to their record of deaths, beginning with the lowest: June, February, May, December, November, April, January, October, March, July, September, August.

The constant experience in Massachusetts has been, that the season of midsummer, the third quarter of the year, has been the most fatal period. The next table, showing the quarterly percentages of deaths in each of the last ten years, gives evidence of this fact. In England, the season of greatest cold is the season of highest death-rates.

	PERCENTAGE OF DEATHS FOR QUARTER ENDING WITH			
	March.	June.	September.	December.
1868	23·8	21·7	30·9	23·6
1869	24·5	22·4	28·8	24·3
1870	22·2	21·5	32·2	24·1
1871	23·4	23·0	30·5	23·1
1872	22·1	21·9	33·3	22·7
1873	24·3	22·2	30·8	22·7
1874	22·6	23·4	29·6	24·4
1875	24·7	22·5	29·4	23·4
1876	25·6	22·3	29·4	22·7
1877	24·4	22·2	29·7	23·7
Average	23·7	22·3	30·5	23·5

Weather-record. — In this connection we may profitably examine the record of the weather in 1877, for the purpose of determining whether it shows any unusual features. The following is a summary of the observations on the temperature as they were registered at Cambridge and at Amherst in 1877, and during the last ten years: —

MEAN MONTHLY TEMPERATURE in degrees Fahrenheit.

MONTHS.	CAMBRIDGE.		AMHERST.	
	1877.	Ten years, 1868-77.	1877.	Ten years, 1868-77.
January	21·4	25·3	20·0	24·2
February	30·7	25·2	30·8	24·5
March	33·8	31·4	33·3	31·4
April	44·8	43·2	47·8	44·3
May	56·6	55·6	58·5	55·0
June	69·2	66·6	67·8	67·3
July	72·4	72·3	71·1	71·1
August	71·9	69·6	71·3	69·1
September	63·7	60·9	63·3	60·0
October	50·3	49·8	50·5	48·4
November	42·2	37·4	51·9	37·3
December	33·2	27·5	33·1	26·2
Average Annual Temperature .	49·2	47·1	49·1	46·6

The month of January was considerably colder than its decennial mean: all the other months of the year were warmer than usual.

Sex.— The deaths of females in 1877 exceeded the deaths of males by 467. There were 15,427 deaths of males, and 15,894 deaths of females; being in the proportion of 97 of the former to 100 of the latter. This disparity is largely due to an excess of females in the general population at all ages; for, if we calculate the rate of deaths per 1,000 of the living of the two sexes, we find that the mortality was greatest among the males. The death-rate in 1877 among males was 18·47 per 1,000, and that of females was 17·63; in 1876 the rates were 20·2 and 18·9, respectively; in 1875 they were 21·8 and 20·5.

The next table presents a comparison of the mortality of males and that of females during a series of years:—

	Deaths of Males (Annual average).	Deaths of Females (Annual average).	Males to 100 Females.
1852-61	10,487	10,602	98·9
1862-65*	13,602	12,748	106·7
1866-70	12,459	12,579	99·0
1871-75	16,451	16,281	100·9
1876	16,485	16,669	98·8
1877	15,427	15,894	97·1

* Four years of war.

Age.— In the following table the relation of age to mortality in 1877 is presented:—

DEATHS at Different Ages — 1877.

	Under 1 Year.	Under 5 Years.	20 to 30.	All others.	Totals.
I. Deaths					
{ Males	3,469	6,023	1,291	8,124	15,438
{ Females	2,874	5,147	1,676	9,081	15,904
{ Totals	6,343	11,170	2,967	17,205	31,342
II. Percentage for each sex					
{ Males	22·47	39·02	8·36	52·62	100·
{ Females	18·08	32·36	10·54	57·10	100·
III. Percentages for each period of life	20·24	35·64	9·47	54·89	100·
IV. Females to 1,000 males	829	854	1,298	1,117	1,030

The second series of figures in the foregoing table exhibits the mortality in 1877 in each of the two sexes from infancy to old age. It appears that more male infants than female infants died, the excess of male infants at birth being the cause of this preponderance. A similar disparity, somewhat greater in degree, marks the mortality of children under five years old. Between the ages of twenty and thirty, however, female lives were encroached upon more than male lives; and at ages above thirty, and between five and twenty, the mortality among females was in marked excess.

The next line of percentages (III.) tells the story of mortality at different periods of life. It shows that, in 1877, more than a fifth of all the deaths were those of infants; that more than a third of the total mortality fell on young children; and that the period of life from twenty to thirty was comparatively exempt.

A comparison of the mortality in 1877 with that in previous years is made in the two following tables. The deaths in infancy were less in proportion in 1876 and 1877 than in any year of the decade.

DEATHS at Different Ages. — *Percentages.*

	Under 1 Year.	Under 5 Years.	20 to 30.	All others.	Totals.
1868	21·17	36·59	9·58	53·83	100·
1869	20·60	35·40	10·02	54·58	100·
1870	22·71	36·12	10·56	53·32	100·
1871	21·46	34·00	10·57	55·43	100·
1872	23·96	38·75	10·76	50·49	100·
1873	23·33	36·49	10·46	53·05	100·
1874	23·49	36·58	9·88	53·54	100·
1875	22·05	36·76	9·33	53·91	100·
1876	20·19	36·19	9·07	54·74	100·
1877	20·24	35·64	9·47	54·89	100·

The average of the numbers for the past ten years is given in the following table: —

DEATHS at Different Ages. — *Ten Years — 1868-77.*

			Under 1 Year.	Under 5 Years.	20 to 30.	All others.	Totals.
I. Deaths	{ Males .	.	37,087	59,808	13,937	79,873	153,618
	{ Females	.	30,449	51,807	17,667	85,161	154,635
	{ Totals	.	67,536	111,615	31,604	165,034	308,253
II. Percentages for each sex,	{ Males .	.	24.14	38.93	9.07	52.00	100.
	{ Females	.	19.69	33.50	11.43	55.07	100.
III. Percentages for each period of life			21.91	36.21	10.25	53.54	100.
IV. Females to 1,000 males .			821	866	1,267	1,066	1,006

The reduced infant-mortality in 1877, which is made apparent on a study of the foregoing tables, is still further illustrated by the ratio of deaths of infants to births in each of the past ten years.

INFANT-MORTALITY in Massachusetts. — *Ten Years — 1868-77.*

Y E A R S.							Births.	Deaths under one Year.	Deaths under one Year to 100 Births.
1868	36,193	5,421	14.98
1869	36,141	5,368	14.85
1870	38,259	6,206	16.22
1871	39,791	5,996	15.07
1872	43,235	8,390	19.41
1873	44,481	7,911	17.78
1874	45,631	7,489	16.41
1875	43,996	7,712	17.53
1876	42,149	6,700	15.89
1877	41,850	6,343	15.15
Average							41,173	6,754	16.40

In the next table is presented an estimate of the rates of mortality at the various periods of life, from infancy to old age, in the three years, — 1875, 1876, and 1877. A very noteworthy reduction in the mortality among old people and among infants in 1877 is shown: that year seems to have been favorable to health and life at all ages.

DEATH-RATES at Specified Ages — 1875-77.

DEATHS TO EACH 1,000 LIVING.	ALL AGES.	Under 5.	5 to 9.	10 to 14.	15 to 19.	20 to 29.
1875 . . .	21·17	73·96	9·77	4·72	7·73	10·49
1876 . . .	19·59	67·39	11·13	4·51	6·56	9·45
1877 . . .	18·04	61·13	9·30	4·68	6·80	9·08

DEATH-RATES at Specified Ages — *Concluded.*

DEATHS TO EACH 1,000 LIVING.	30 to 39.	40 to 49.	50 to 59.	60 to 69.	70 to 79.	80 and over.
1875 . . .	11·30	12·97	18·29	34·79	77·11	176·41
1876 . . .	10·12	11·87	16·87	32·75	68·63	169·56
1877 . . .	9·49	10·70	15·36	30·39	68·05	159·61

The average age at death in 1877, and in each of the previous nine years, was as follows : —

AVERAGE AGE at Death — 1868-77.

YEARS.	Of All who Died.
1868	29·92
1869	30·38
1870	30·26
1871	31·36
1872	28·27
1873	27·96
1874	29·83
1875	29·81
1876	29·72
1877	30·29
Average	29·78

The following table gives the recorded facts concerning the life and death of fourteen persons — five males and nine females — who are said to have reached and survived in 1877 the remarkable age of one hundred years. Ten of these individuals were born in Ireland. Of course, in the majority of these cases, some doubt may reasonably rest on the accuracy of the alleged age.

AGED One Hundred Years. — *Died in 1877.*

Date of Death.	NAME.	AGE.		Place of Death.	Birthplace.	Whether previously Married or Single.

Nativity of Decedents. — The accompanying table exhibits the numbers and percentages of those who died in 1877, distributed in the several counties according to their place of birth. It is necessary to observe again that the class called “native-born” contains a large and indeterminable “foreign” element, — foreign in a strictly ethnological sense, though literally of American nativity.

NATIVITY of those whose Deaths were registered in 1877.

† Excluding those whose nativity was not recorded.

CAUSES OF DEATH.

We have the data of the causes of 30,432 of the 31,342 deaths which were registered in Massachusetts in 1877. These causes, distributed according to the nosological divisions long in use in this country and in England, were as follows :—

CLASSES.	Deaths.	Percentages.	Deaths to 1,000 of Population.*
Zymotic diseases	8,709	28·6	5·17
Constitutional diseases . . .	7,630	25·1	4·52
Local diseases	9,662	31·7	5·73
Developmental diseases . . .	3,228	10·6	1·91
Violent deaths	1,203	4·0	·71
Totals	30,432	100·0	18·04

* Corrected for unspecified causes of death.

There is a decided reduction in the mortality-rate in each of the five classes, corresponding with the reduced general death-rate; but the most important decline, as compared with the previous year, is in the zymotic class, the ratio in 1876 being 5·76, while in 1877 it is 5·17. This latter low rate of mortality indicates the absence from our borders of any wide-spread or destructive epidemic, and is a near approximation to the zymotic death-rate of a healthy community.

How the five classes of the causes of death have been related to each other in the last ten years appears in the next table of percentages :—

YEARS.	CLASSES.				
	Zymotic.	Constitutional.	Local.	Developmental.	Violent Deaths.
1868	27·3	25·0	28·4	15·3	4·0
1869	26·8	25·5	27·9	15·6	4·2
1870	25·6	26·6	28·1	15·6	4·1
1871	23·3	25·9	29·1	17·1	4·6
1872	30·9	23·1	27·7	14·6	3·7
1873	28·7	23·8	27·9	15·2	4·4
1874	25·7	23·8	30·4	15·7	4·4
1875	28·6	24·3	31·8	11·2	4·1
1876	29·4	23·9	31·3	11·0	4·4
1877	28·6	25·1	31·7	10·6	4·0

We pass now to a more particular study of the various diseases of which the five general classes are composed.

The number of deaths from the most destructive members of the *zymotic* group, during the past ten years, is presented in the accompanying table:—

YEARS.	DISEASES.								
	Dysentery.	Typhoid Fever.	Whooping-Cough.	Croup.	Diphtheria.	Measles.	Scarlatina.	Cholera Infantum.	Smallpox.
1868 . .	685	896	247	485	297	287	1,369	1,561	20
1869 . .	481	1,205	320	473	296	222	1,405	1,424	59
1870 . .	471	1,333	330	434	242	269	683	1,914	131
1871 . .	389	1,116	243	473	274	131	867	1,718	295
1872 . .	564	1,703	363	480	273	428	1,377	3,254	1,029
1873 . .	435	1,406	264	435	310	180	1,472	2,553	668
1874 . .	366	1,147	449	411	502	161	1,382	2,322	26
1875 . .	437	1,059	242	680	1,200	233	1,684	2,606	34
1876 . .	417	881	192	684	2,610	47	1,222	2,087	31
1877 . .	580	814	369	544	2,634	135	467	1,927	26

Dysentery, whooping-cough, and diphtheria (the latter especially) exceeded their usual annual fatality.

The most fatal of the group of *constitutional diseases* are shown in the next table:—

YEARS.	DISEASES.		YEARS.	DISEASES.	
	Cancer.	Consumption.		Cancer.	Consumption.
1868 . . .	445	4,437	1873 . . .	611	5,556
1869 . . .	492	4,659	1874 . . .	585	5,284
1870 . . .	516	5,003	1875 . . .	593	5,738
1871 . . .	551	5,070	1876 . . .	657	5,327
1872 . . .	542	5,556	1877 . . .	646	5,457

The principal diseases of the *local* class have been fatal during the ten years, as follows:—

YEARS.	DISEASES.									
	Apoplexy.	Paralysis.	Insanity.	Convulsions.	Heart Diseases.	Bronchitis.	Pleurisy.	Pneumonia.	Peritonitis.	Bright's Disease.
1868 . .	311	630	91	499	977	241	100	1,651	67	76
1869 . .	331	607	87	479	911	239	93	1,736	72	125
1870 . .	394	630	103	527	978	259	75	1,718	86	140
1871 . .	390	714	89	522	1,149	272	90	1,858	69	199
1872 . .	409	791	103	658	1,218	287	81	2,295	100	223
1873 . .	431	858	88	629	1,252	328	90	2,097	102	271
1874 . .	433	775	100	595	1,293	395	103	2,386	129	299
1875 . .	460	896	118	607	1,355	433	103	2,940	155	293
1876 . .	507	826	146	597	1,370	428	86	2,447	123	308
1877 . .	544	873	112	568	1,391	397	82	1,972	126	329

The progressive mortality from apoplexy is a suggestive feature of the above table. Heart diseases and Bright's disease of the kidneys also show a remarkable increase during the decade. It is probable that this increase is in some measure apparent only, many deaths which formerly would have been registered as due to "dropsy" being now correctly ascribed to diseased conditions of which dropsy is a symptom only.

The fatality from diseases and conditions of the *developmental order*, during the last ten years, is given in the next table :—

Y E A R S.	D I S E A S E S.				
	Teething.	Childbirth.	Abortion.	Puerp. Con- vulsions.	Old Age.
1868	234	208	6	8	1,309
1869	254	251	4	25	1,375
1870	308	252	8	17	1,444
1871	260	229	1	16	1,554
1872	367	267	3	15	1,664
1873	348	301	2	28	1,672
1874	286	293	7	34	1,549
1875	325	298	10	19	1,732
1876	273	236	20	20	1,661
1877	259	159	10	29	1,586

Violent deaths have occurred as follows :—

Y E A R S.	Burns and Scalds.	Poison.	Railroad Accidents.	Drowning.	Frozen.	Heat.	Homicide.	Suicide.
1868	70	25	96	231	3	85	16	88
1869	83	26	93	283	3	1	25	92
1870	89	26	133	306	2	46	29	91
1871	101	29	161	346	2	10	25	122
1872	93	26	122	299	2	71	27	117
1873	88	30	126	432	2	22	26	117
1874	84	45	104	436	2	18	26	115
1875	171	23	102	330	12	11	23	159
1876	98	33	108	475	5	38	24	119
1877	83	38	137	260	2	10	20	163

The next table gives the principal causes of death in 1877 and in the previous four years, arranged according to the order of their fatality.

In 1877 consumption held the first rank as a destroyer of Massachusetts lives, maintaining its usual place. Diphtheria, this year as last, is second in the list, attesting its continued fatality. Scarlatina, in previous years quite destructive, fell in 1877 to the fourteenth place. Dysentery was unusually severe. The other diseases in the list were not far out of their accustomed relation, if they were disturbed therefrom at all.

These twenty principal causes of death accounted for seventy per cent of all the deaths registered in 1877.

CAUSES OF DEATH.	Deaths Registered in 1877.	Proportional number from each cause to 1,000 Deaths from all causes.	ORDER OF FATALITY.				
			1877.	1876.	1875.	1874.	1873.

Drowning . . .	260	9	20	14	19	12	14

The question, What were the five most fatal diseases in each of the counties in 1877? is answered in the following table, which gives for each county the percentage which each of the principal causes of death bears to all the deaths whose causes were certified. Consumption, of course, was easily first; but the several counties present some noteworthy contrasts in their percentages: thus, while in Barnstable, Dukes and Nantucket, and Franklin, more than a fifth of the deaths were due to consumption, that disease was in considerably less proportion as a cause of death in Berkshire, Essex, Norfolk, and Suffolk Counties. Diphtheria has a prominent position in the columns of the second and third rank: the disease was quite generally distributed throughout the State. Pneumonia was the cause of many deaths in all the counties, its place being near the head of the list. It is interesting to remark that old age is assigned as a cause of so many deaths, outranking the fatality of more controllable conditions: this feature is especially noteworthy in the rural counties, like Barnstable, Berkshire, Franklin, Hampshire, Norfolk, and Plymouth. Typhoid fever was relatively less prevalent than usual. Scarlatina does not show itself in the table: excepting diphtheria, the infectious diseases made but slight impression on the mortality of Massachusetts in 1877.

The Five Most Destructive Causes of Death in each County — 1877.

COUNTIES.	1.	2.	3.	4.	5.
Barnstable . .	Consumption . 23·5	Old Age . . 9·4	Pneumonia . 6·5	Heart Disease . 6·5	Paralysis . . 6·3

Worcester . . .	Consumption . 18.0	Diphtheria . 8.3	Pneumonia . 6.7	Old Age . . 5.7	Cholera Inf'm . 5.1

The next table answers the question, What were the principal causes of death at each of several specified periods of life in 1877? The numbers attached to each disease give the death-rate per 10,000 of the estimated population at each period of life.

Some very interesting features characterize this table. Thus, in infancy, the diarrhœal diseases of summer surpassed all the other causes of death; in the period from five to fifteen, the age of adolescence, diphtheria was most destructive; toward the end of that period, consumption begins to assert its sway, and, from fifteen onward to seventy, its place is in the front rank of the destroyers; typhoid fever finds its victims most numerous at ages from fifteen to thirty; in middle life, heart disease and pneumonia rank after consumption; as old age comes on, the conditions which indicate a progressive degeneration of the vital powers take the lead in fatality, to the exclusion of the more acute affections. Among the especially noteworthy facts displayed here is the fatality of cancer at ages from forty to seventy, the death of twenty-four children (twenty-one boys and three girls) by drowning, and the fact that seventy-five women between thirty and forty years of age died in childbed.

But, while these relations of the causes of death at different ages afford opportunity for interesting study, the contrasts offered by the mortality-rates at the various periods of life are quite as suggestive.

The Five Most Destructive Causes of Death (with Death-rates) at Specified Periods of Life. — 1877.

Apoplexy.—The deaths attributed to this cause in 1877 numbered 544,—37 in excess of the mortality in 1876. The following table exhibits the progressive fatality of this affection in common with other diseases of the central nervous system, the expression of the overwork and anxiety pertaining to modern American life:—

YEARS.	Apoplexy.	Paralysis.	Insanity.	Unspecified Diseases of the Brain.	Totals.
1858	197	369	62	617	1,245
1859	207	375	59	610	1,254
1860	238	402	71	630	1,441
1861	274	417	61	764	1,516
1862	251	401	66	716	1,434
1863	268	471	62	798	1,599
1864	321	473	64	1,068	1,926
1865	263	479	75	964	1,781
1866	261	487	106	885	1,739
1867	281	469	111	806	1,667
1868	311	630	91	922	1,954
1869	331	607	87	923	1,948
1870	394	630	103	968	2,095
1871	390	714	89	998	2,191
1872	409	791	103	1,487	2,790
1873	431	858	88	1,184	2,561
1874	433	775	100	1,134	2,442
1875	460	896	118	1,142	2,616
1876	507	826	146	1,053	2,532
1877	544	873	112	1,011	2,540

The increase observed in the annual mortality from brain diseases is out of proportion to the increase in population meanwhile: this is shown in the next table, which gives the mortality-rates from these diseases for the four years in which the population was known by actual enumeration:—

	1860.	1865.	1870.	1875.
Mortality-rates per 10,000 from —				
Apoplexy	1.93	2.08	2.70	2.78
Paralysis	3.26	3.78	4.32	5.43
Insanity58	.59	.71	.71
Unspecified Diseases of the Brain .	5.93	7.61	6.64	6.91
Totals.	11.70	14.06	14.37	15.83

The mortality-rate from apoplexy in 1877 was greater than it was in 1875: the rates for the other diseases of this class were somewhat less.

Of the deaths due to apoplexy, 276 were those of males, and 268 were those of females; but, when the disparity of the two sexes in the general population—the excess of females—is considered, the mortality fell much the more heavily on the male sex.

Sixty-three per cent of the deaths from apoplexy occurred at ages above sixty: of the cases assigned to paralysis, which very often dates from apoplexy as its antecedent condition, seventy-seven per cent were persons over sixty years old.

Nearly a third (28 per cent) of the mortality from apoplexy fell to Suffolk County.

Cancer.—This terrible disease caused 646 deaths in 1877: in 1876 the mortality numbered 657. Of those who died, seventy-three per cent (470) were females. The deaths were most numerous at ages between fifty and seventy, being equally divided between the two decades. In proportion to the population, the mortality was greatest in Dukes and Nantucket Counties.

Cholera Infantum is the expressive name used to designate the midsummer scourge of infancy. As each August returns, it is sure to witness the record of hundreds of young lives destroyed by this disease. In some years the list of victims may diminish somewhat from various favoring causes; but the annual mean, as may be observed in the following table, is a fearful fatality, and represents a lamentable loss of young children:—

YEARS.										Deaths from Cholera Infantum.	Percentage of Deaths from all Causes.
1868	1,561	6·1
1869	1,424	5·5
1870	1,914	7·0
1871	1,718	6·2
1872	3,254	9·3
1873	2,553	7·5
1874	2,322	7·3
1875	2,606	8·1
1876	2,087	6·3
1877	1,927	6·1
Average	2,137	6·9

The mortality fell most heavily to the month of August; 701 deaths being registered in that month. Of the whole number (1,927) of deaths, 1,706 (88 per cent) were recorded in the three months, — July, August, and September.

The deaths were relatively the most numerous in Bristol, Essex, Hampden, Middlesex, Suffolk, and Worcester Counties. Cholera infantum shuns the open country, and lurks in crowded courts and tenement-houses.

Consumption.—The group of wasting pulmonary diseases represented by this comprehensive term was recorded in 1877 as the cause of 5,457 deaths, comprising 17·9 per cent of the entire mortality of the year.

The deaths were distributed among the months and quarters of the year as follows : —

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Months . . .	495	410	474	490	470	399	473	435	467	459	451	434
Quarters . . .	1,379			1,359			1,375			1,344		
Percentages . .	25·3			24·9			25·2			24·6		

By the next table we learn upon which sex and at what period of life the disease bears most heavily : —

	Numbers.	Percentages.
Males	3,398	43·9
Females	3,059	56·1
Totals	5,457	100·
Under 15	403	7·4
15 to 20	616	11·3
20 to 30	1,635	29·9
30 to 40	1,046	19·2
40 to 50	637	11·7
Over 50	1,104	20·2
Age not stated	16	·3
All ages	5,457	100·

Consumption is most fatal to females, and in the decade of life between 20 and 30 years.

The following table shows the relation of the counties to each other with reference to deaths from consumption in 1877:—

COUNTIES.	Number of Deaths.	Percentage of the total mortality.
Barnstable	120	23·5
Berkshire	165	15·8
Bristol	459	17·3
Dukes and Nantucket	50	20·6
Essex	765	16·7
Franklin	106	21·6
Hampden	277	17·4
Hampshire	138	18·1
Middlesex	919	17·1
Norfolk	240	16·2
Plymouth	230	19·8
Suffolk	1,319	16·4
Worcester	669	18·0
Whole State	5,457	17·9

In its relation to other causes of death, consumption was most fatal in Barnstable, Franklin, Dukes and Nantucket, Plymouth and Hampshire Counties.

The next table, which presents the mortality from consumption during the past twenty-five years, shows a progressive improvement in the death-rate from that cause, and encourages a belief that various favoring influences are at work to lessen the destructive effects of this New-England disease:—

YEARS.	No. of Deaths from Consumption.	Deaths from Consumption to each 100,000 living.	YEARS.	No. of Deaths from Consumption.	Deaths from Consumption to each 100,000 living.
1853	4,593	427	1866	4,600	353
1854	4,611	418	1867	4,362	325
1855	4,750	419	1868	4,437	322
1856	4,701	408	1869	4,659	328
1857	4,625	395	1870	5,003	343
1858	4,574	384	1871	5,070	330
1859	4,704	388	1872	5,556	363
1860	4,557	370	1873	5,556	354
1861	4,522	365	1874	5,284	328
1862	4,269	343	1875	5,738	347
1863	4,667	372	1876	5,327	315
1864	4,733	376	1877	5,457	314
1865	4,661	368			

Diphtheria.—The registered deaths from this cause numbered 2,634 in 1877: this mortality is unprecedented in this State. The disease has manifested its influence in Massachusetts during the last three years in an extraordinary manner, as regards both extent and continuance. Hitherto there has been no outbreak of the disease to compare with the present in severity and duration. The deaths from diphtheria in 1877 comprised 8.6 per cent of all the deaths whose causes were specified.

The following table, presenting the number of deaths from diphtheria annually since 1858, when the disease first found a place in the registration returns, gives a good notion of the periodicity of this fatal epidemic influence in this State:—

Y E A R S.	Number.	Y E A R S.	Number.
1858	18	1868	297
1859	32	1869	296
1860	258	1870	242
1861	643	1871	274
1862	663	1872	273
1863	1,420	1873	310
1864	1,231	1874	502
1865	672	1875	1,200
1866	399	1876	2,610
1867	251	1877	2,634

By the following table it will be seen that no part of the State was exempt from the disease, although its mortality was unequally distributed. It prevailed more in the eastern and middle sections than in the Connecticut Valley, where it was so fatal in 1875 and 1876. Dukes and Nantucket Counties, which escaped wholly in 1876, reported the largest mortality-rate in 1877.

COUNTIES.	Deaths from Diphtheria.	No. of Deaths to each 10,000 living.	Percentages of Deaths from Diph- theria to Deaths from all Causes.
Barnstable	22	7	4·3
Berkshire	131	18	12·5
Bristol	180	13	6·8
Dukes and Nantucket	33	45	13·6
Essex	645	27	14·1

The distribution of the mortality, according to seasons, is shown in the next table : —

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Months . . .	281	250	209	210	209	177	143	122	212	303	288	230
Quarters . . .	740			596			477			821		
Percentages . .	28·1			22·6			18·1			31·2		

More than one-half of the decedents — 59 per cent — were children under five years old, and seven-eighths of the deaths occurred among children under ten years old.

Croup and Diphtheria. — In the Report for 1875, some reasons were advanced for combining the statistics of the mortality from these two similar, if not identical, diseases : it was shown that there was special propriety in placing these two causes of death side by side for concurrent study. Continuing this plan the present year, we give the statistics of mortality from croup and diphtheria in Massachusetts during the past twenty years.

YEARS.				DEATHS.			PERCENTAGE OF DEATHS FROM ALL CAUSES.			DEATHS TO EVERY 100,000 LIVING.		
				Croup.	Diphtheria.	Total.	Croup.	Diphtheria.	Total.	Croup.	Diphtheria.	Total.

1877	.	.	.	544	2,634	3,178	1.78	8.65	10.43	31	152	183

There is considerable decline in the recorded mortality from croup in 1877. It is probable that a part of the deaths charged to diphtheria would be more correctly entered as due to croup; but the error, if it exists, is lost in the total which comprises both diseases. This aggregate in 1877 is less than that of 1876; yet diphtheria, being the single disease which prevailed in 1877 much beyond its ordinary degree, appears in marked excess above its usual percentage proportion, — a proportion (8·65) so large, that the greatly lessened percentage of deaths by croup (1·78) is unable to reduce the total of both diseases (10·43) below the total of the previous year (10·24). The ratio of deaths to population, however, presents a decline from that of the previous year.

Dysentery is recorded as the cause of 580 deaths in 1877; a noteworthy increase when compared with the total (417) registered in 1876. These 580 deaths were in the proportion of 33 to every 100,000 of the population, and comprised two per cent of all the mortality. Four-fifths of the deaths occurred in July, August, and September. One-half of the decedents were under five years old, and more than one-fourth were over sixty years old.

The prevalence of the disease in the various counties is shown in the next table. In proportion to the population, the greatest mortality occurred in Middlesex, Norfolk, and Suffolk Counties.

Measles.—The number of deaths from this disease (135), though in excess of that registered in 1876, is below the average annual mortality. Some deaths, properly chargeable to measles, are probably recorded as caused by the secondary complications of that disease, and do not appear here.

The statistics of the mortality from measles during the last twenty years are as follows :—

YEARS.	Deaths from Measles.	Percentage of Deaths from Measles to Deaths from all Causes.	Death-rate per 100,000 living.
1858	301	1·43	25
1859	110	·52	9
1860	224	·95	18
1861	209	·86	17

1874	661	·50	10
1875	233	·67	14
1876	47	·14	3
1877	135	·44	8

Pneumonia.—This disease was less destructive than usual in 1877. The deaths charged to it numbered 1,972; a total less by 475 than the number recorded in 1876. It will be seen by the following table that the year 1877 was comparatively a favorable one so far as this cause of death was concerned :—

YEARS.	Deaths from Pneumonia.	Deaths to 100,000 living.	YEARS.	Deaths from Pneumonia.	Deaths to 100,000 living.
1858 . . .	1,174	96	1868 . . .	1,651	119
1859 . . .	1,167	96	1869 . . .	1,736	122
1860 . . .	1,333	108	1870 . . .	1,718	119
1861 . . .	1,285	103	1871 . . .	1,858	124
1862 . . .	1,140	92	1872 . . .	2,295	149
1863 . . .	1,724	138	1873 . . .	2,097	133
1864 . . .	1,801	140	1874 . . .	2,386	148
1865 . . .	1,493	118	1875 . . .	2,940	178
1866 . . .	1,639	125	1876 . . .	2,447	144
1867 . . .	1,378	103	1877 . . .	1,972	114

The following table gives the distribution of the mortality with regard to ages, the deaths at ages not stated being omitted:—

A G E S.										Deaths from Pneumonia.	Percentages.
Under 5	667	33.9
to 10	58	3.0
Under 10	725	36.9
10 to 20	68	3.4
20 to 30	108	5.5
30 to 40	121	6.1
40 to 50	153	7.8
50 to 60	166	8.4
60 to 70	231	11.7
70 to 80	270	13.7
Over 80	127	6.5
All Ages	1,969	100.0

In the next table the relation of the seasons to the mortality from pneumonia in 1877 is shown:—

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.
Months . . .	243	228	336	247	178	107	56	68	77	93	157	182
Quarters . . .	807			532			201			432		
Percentages .	40.9			27.0			10.2			21.9		

Pneumonia is most fatal in infancy and old age, and in the first quarter of the year.

The mortality-rate from pneumonia in 1877, for males, was 115 to each 10,000 of the living: for females it was 112.

Scarlatina shows by its mortality-record of 1877, that, after a sway of five years, it is again disappearing from among the people of Massachusetts, affording a most welcome respite. The mortality in 1877 was very low.

Y E A R S.	Deaths from Scarlatina.	Percentage of Deaths from Scarlatina to Deaths from all Causes.	Death-rates per 100,000 living.
1858	1,051	4.99	88
1859	1,038	4.88	86
1860	916	3.92	74
1861	1,137	4.66	92
1862	1,261	5.42	101
1863	1,399	5.01	111

1874	1,382	4.33	86
1875	1,684	4.81	102
1876	1,222	3.79	72
1877	467	1.53	27

Smallpox also, like scarlatina, appears to have exhausted its energy, for a time at least, in the extraordinary epidemic in 1872 and 1873. The mortality in 1877 from this disease is worthy of special mention because of its littleness.

YEARS.					Deaths from Smallpox.	Percentage of Deaths from Smallpox to Deaths from all Causes.	Death-rate per 100,000 living.
1852	33	·18	3
1853	38	·19	4
1854	207	·98	19
1855	328	1·47	29
1856	140	·68	12

1867	196	·82	15
1868	20	·08	2
1869	59	·22	4
1870	131	·48	9
1871	294	1·05	19
1872	1,029	2·94	67
1873	668	1·97	43
1874	26	·08	2
1875	34	·09	2
1876	31	·09	2
1877	24	·08	2

All the fatal cases of smallpox in 1877 occurred in the early part of the year, no deaths having been registered in either of the last five months. Suffolk and Hampden Counties reported a majority of the deaths.

Typhoid Fever.—The record of the mortality from this disease in 1877 is gratifying: the small number of deaths registered is without precedent in any of the past twenty years. There is less chance for error in certifying the cause of death in

fatal cases of autumnal fever than there is in connection with many other diseases: therefore there is but little doubt that the registry for the present year, small as it is, approximates closely to an accurate statement. It is especially pleasing that this typical "filth-disease" showed in the past year so little destructive power.

Y E A R S.	Deaths from Typhoid Fever.	Percentage of Deaths from Typhoid Fever to Deaths from all Causes.	Deaths to each 100,000 living.
1858	901	4.27	76
1859	932	4.38	77
1860	937	3.97	76
1861	989	4.06	79
1862	1,135	4.88	91
1863	1,442	5.16	115
1864	1,344	4.66	107
1865	1,694	6.43	134
1866	1,091	4.53	84
1867	965	4.24	72
1868	896	3.49	65
1869	1,205	4.62	85
1870	1,333	4.88	91
1871	1,116	3.99	75
1872	1,703	4.86	111
1873	1,406	4.15	89
1874	1,147	3.56	71
1875	1,059	3.06	64
1876	881	2.74	52
1877	814	2.67	47

Nearly a quarter of the decedents (23 per cent) were at ages between twenty and thirty; and nearly one-half the deaths (47 per cent) occurred in September, October, and November.

* Five cases of triplets were registered in the year 1877; of foreign parentage, a male and two females in Essex County, and two males and a female in Worcester County; a case in Plymouth County comprising three females, and one in Suffolk County of a male and two females; also a case in Essex County of which the father was American, and the mother foreign born, comprising two males and a female. The very unusual circumstance of a birth comprising four individuals occurred in Essex County, of which one was a male and three were females, and of American parentage: three lived eight hours only, and the other eighteen days.

V.—5. <i>Execution.</i>	—	—	—	—	—	—	—	—	—	—	—	—	—	—
Sudden, cause unknown	4	1	—	—	3	—	—	—	—	—	—	—	—	—
Causes not specified *	906	34	65	70	5	118	30	103	28	165	36	46	62	144

* Comprising 68 deaths from "Hemorrhage," 72 from "Tumor," 23 from "Inflammation," and 743 deaths either returned as "Unknown," or of which no cause was stated in the Return.

NOTE.—When a person is "found drowned," the case is classed under "accident or negligence." (V.—1. 4.) Cases of death from cold, heat, drinking cold water, lightning, surgical operation, and exposure, are classed under "accident or negligence." (V.—1. 6.) As "stricture of the urethra" is almost invariably the result of gonorrhoea, it is classed as (1.—2. 2.)—[Dr. FARR.]

N O T E.

Previously to the adoption, in the Registration Report of 1855, of the present NOSOLOGICAL ARRANGEMENT of Tables IX. and X., the term "Infantile" in those Tables included under a single designation not only all deaths returned under the several heads "Infantile," "Premature," or "Premature Births," but also all ascribed to "Debility" or "Unknown" causes, if under two years of age.

This plan was continued until the Registration Report of 1868, in which, to secure greater accuracy, the method now employed was adopted, by which Deaths returned under the head of "Premature," "Premature Births," or "Infantile," are stated *separately* in Table VIII., and *combined* in Tables IX. and X. Deaths of children under two years, from "Debility" or "Unknown" cause, are no longer classed as "Infantile."

See Registration Report of 1868, p. cv, for a fuller explanation.

TABLE X.—CAUSES OF DEATH.—COMPARATIVE MORTALITY.

Exhibiting the Number of Deaths from Specified Causes (Nosologically Arranged) during each of the Five Years 1873-74-75-76-77, with the Number of Deaths, annually, to 100,000 of the Population; also the Number and Percentage of Deaths during the Five Years 1873-77, and during the entire Registration Period of Thirty-Six Years and Eight Months, ending December 31, 1877.*

[Still-births included.]

APPENDIX.

L A W S

CONCERNING THE REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

[General Statutes — Chapter 21.]

OF THE REGISTRY AND RETURNS OF BIRTHS, MARRIAGES, AND DEATHS.

SECTION

1. City and Town Clerks to obtain, record, and index facts concerning Births, Marriages, and Deaths.
2. Parents and others to give notice of Births and Deaths.
3. Physicians to give Certificate of Cause of Death, when requested. Penalty.
4. Sextons, Undertakers, &c., to make returns to Clerks of Cities and Towns. Clerks to give Certificate of Registry of Death to the Person having charge of funeral rites *preliminary* to Interment, for delivery, &c. If Interment takes place without such Certificate, notice thereof to be given, under penalty of twenty dollars.
5. Clerk annually to transmit certified Copies of Records to Secretary.
6. Record or Certificate of Clerk to be *prima facie* evidence in Legal Proceedings.

SECTION

7. Clerks — Fees of, payable by City or Town; Accounts of, to be certified by Secretary. Penalty for neglect of duty.
8. Superintendents of State Almshouses to record, and return to Secretary, births and deaths therein.
9. Secretary to furnish Blank Books for Records and forms for Returns, with Instructions. Clerks to distribute the Blank Forms for Returns.
10. Secretary, — to cause Returns to be bound &c.; to Report annually to Legislature, &c.; to do all other acts necessary to secure the execution of the provisions of this chapter.
11. Registrars may be chosen, in certain cases, in place of Town Clerks.

SECTION 1. The clerk of each city and town shall receive or obtain, and record, and index, the following facts concerning the births, marriages, and deaths, therein, separately numbering and recording the same in the order in which he receives them, designated in separate columns :

In the record of births, the date of the birth, the place of birth, the name of the child (if it have any), the sex and color of the child, the names and the places of birth of the parents, the occupation of the father, the residence of the parents, and the date of the record ;

In the record of marriages, the date of the marriage, the place of marriage, the name, residence, and official station of the person by whom married, the names and places of birth of the parties, the residence of each, the age and color of each, the condition of each

(whether single or widowed), the occupation, the names of the parents, and the date of the record.

In the record of deaths, the date of the death, the name of the deceased, the sex, the color, the condition (whether single, widowed, or married), the age, the residence, the occupation, the place of death, the place of birth, the names and places of birth of the parents, the disease or cause of death, the place of burial, and the date of the record.

SECTION 2. Parents shall give notice to the clerk of their city or town of the births and deaths of their children; every householder shall give like notice of every birth and death happening in his house; the eldest person next of kin shall give such notice of the death of his kindred; the keeper of a workhouse, house of correction, prison, hospital, or almshouse, except the state almshouses at Tewksbury, Bridgewater, and Monson, and the master or other commanding officer of any ship, shall give like notice of every birth and death happening among the persons under his charge. Whoever neglects to give such notice for the space of six months after a birth or death, shall forfeit a sum not exceeding five dollars.

SECTION 3. Any physician having attended a person during his last illness, shall — when requested within fifteen days after the decease of such person — forthwith furnish for registration a certificate of the duration of the last sickness, the disease of which the person died, and the date of his decease, as nearly as he can state the same. If any physician refuses or neglects to make such certificate, he shall forfeit and pay the sum of ten dollars to the use of the town in which he resides.

SECTION 4.* Every sexton, undertaker, or other person having charge of a burial-ground, or the superintendent of burials having charge of the obsequies or funeral rites preliminary to the interment of a human body, shall forthwith obtain and return to the clerk of the city or town in which the deceased resided or the death occurred, the facts required by this chapter to be recorded by said officer concerning the deceased, and the person making such return shall receive from his city or town the fee of ten cents therefor.

The clerk, upon recording such facts, shall forthwith give to the person making such return, a certificate that such return has been made, which certificate such person shall deliver to the person having charge of the interment, if other than himself, before the burial when practicable, otherwise within seven days thereafter. When a burial takes place and no certificate is delivered as aforesaid, the sexton, undertaker, or other person having charge of the interment, shall forthwith give notice thereof to the clerk under penalty of twenty dollars.

SECTION 5. The clerk of each city and town shall annually, on or before the first day of February, transmit to the secretary of the Commonwealth, certified copies of the records of the births, marriages, and deaths, which have occurred therein during the year ending on the last day of the preceding December.

SECTION 6. The record of the town clerk relative to any birth, marriage, or death, shall be *primâ facie* evidence, in legal proceedings,

* See chap. 202, on page clviii., following.

of the facts recorded. The certificate signed by the town clerk for the time being shall be admissible as evidence of any such record.

SECTION 7.* The clerk shall receive from his city or town for obtaining, recording, indexing, and returning to the secretary of the Commonwealth, the facts in relation to a birth, twenty cents; a marriage, ten cents; a death, twenty cents for each of the first twenty entries, and ten cents for each subsequent entry, as the same shall be certified by the secretary of the Commonwealth; but a city or town containing more than ten thousand inhabitants may limit the aggregate compensation allowed to their clerk. He shall forfeit a sum not less than twenty nor more than one hundred dollars for each refusal or neglect to perform any duty required of him by this chapter.

SECTION 8. The superintendents of the state almshouses at Tewksbury, Bridgewater, and Monson, shall obtain, record, and make return of the facts in relation to the births and deaths which occur in their respective institutions, in like manner as is required of town clerks. The clerks of said towns shall, in relation to the births and deaths of persons in said almshouses, be exempt from the duties otherwise required of them by this chapter.

SECTION 9. The secretary shall, at the expense of the Commonwealth, prepare and furnish to the clerks of the several cities and towns, and to the superintendents of the state almshouses, blank books of suitable quality and size to be used as books of record under this chapter, blank books for indexes thereto, and blank forms for returns, on paper of uniform size; and shall accompany the same with such instructions and explanations as may be necessary and useful. City and town clerks shall make such distribution of blank forms of returns furnished by the secretary as he shall direct.

SECTION 10. The secretary shall cause the returns received by him for each year to be bound together in one or more volumes with indexes thereto. He shall prepare from the returns such tabular results as will render them of practical utility, make report thereof annually to the legislature, and do all other acts necessary to carry into effect the provisions of this chapter.

SECTION 11. Any city or town containing more than ten thousand inhabitants, may choose a person other than the clerk to be registrar, who shall be sworn, and to whom all the provisions of this chapter concerning clerks shall apply. The returns and notices required to be made and given to clerks shall be made and given to such registrar under like penalties.

SECTION 12. The secretary of this Commonwealth shall prosecute, by an action of tort, in the name of the Commonwealth, for the recovery of any penalty or forfeiture imposed by this chapter.

SECTION 13. Any city or town may make rules and regulations to enforce the provisions of this chapter, or to secure a more perfect registration of births, marriages, and deaths, therein.

* See chaps. 138, 145 and 341, on pp. clvii. and clviii., following.

[General Statutes — Chapter 106.]

OF MARRIAGE.

SECTION

7. Notice of Intention of Marriage to be entered with Town Clerk.
8. Certificate of Record of Intention to be given to Parties by Clerk. Such certificate to be delivered to Person before whom Marriage is to be solemnized.
9. Certificate, not to issue to certain Minors, except on application of Parent, &c. Penalty.
10. Clerk may require Affidavit of Age.
11. Penalty for making False Statement.
12. Parties living in State, and Married out of it, to file certificate on return. Penalty.
13. No Person to solemnize Marriage of a Minor, without consent of Parents, if any in the State competent to act.

SECTION

14. Marriages, by Whom to be solemnized, and in what Place.
15. Marriages among Quakers.
16. Persons solemnizing Marriage to keep Record, and to make Returns to certain Town Clerks. Clerk to record all Marriages so returned.
17. Penalty for not making Returns.
18. Penalty for solemnizing a marriage unlawfully.
19. Penalty, on Person not authorized to Marry.
21. Record of Marriage, or certified copy thereof, presumptive evidence of Marriage.

SECTIONS 1, 2 and 3. [Marriage between certain relatives prohibited.]

SECTION 4. [Polygamy forbidden.]

SECTION 5. [Marriage contracted by insane persons or idiots, void.]

SECTION 6. [Marriage of persons marrying out of the state in order to evade, &c., void.]

SECTION 7. Persons intending to be joined in marriage, shall, before their marriage, cause notice thereof to be entered in the office of the clerk, or registrar of the city or town in which they respectively dwell, if within the State. If there is no such clerk or registrar in the place of their residence, the entry shall be made in an adjoining city or town.

SECTION 8. The clerk or registrar shall deliver to the parties a certificate under his hand, specifying the time when notice of the intention of marriage was entered with him, together with all facts in relation to the marriage required by law to be ascertained and recorded, except those respecting the person by whom the marriage is to be solemnized. Such certificate shall be delivered to the minister or magistrate in whose presence the marriage is to be contracted, before he proceeds to solemnize the same.

SECTION 9. If a clerk or registrar issues such certificate to a male under the age of twenty-one years, or a female under the age of eighteen years, having reasonable cause to suppose the person to be under such age, except upon the application or consent in writing of the parent, master, or guardian, of such person, he shall forfeit a sum not exceeding one hundred dollars; but if there is no parent, master, or guardian, in this State, competent to act, a certificate may be issued without such application or consent.

SECTION 10. The clerk or registrar may require of any person applying for such certificate, an affidavit sworn to before a justice of the peace for the county where the application is made, setting forth the age of the parties; which affidavit shall be sufficient proof of age to authorize the issuing of the certificate.

SECTION 11. Whoever applying for such certificate wilfully makes a false statement in relation to the age or residence, parent, master,

or guardian, of either of the parties intending marriage, shall forfeit a sum not exceeding two hundred dollars.

SECTION 12. When a marriage is solemnized in another State between parties living in this State, and they return to dwell here, they shall, within seven days after their return, file with the clerk or registrar of the city or town, where either of them lived at the time, a certificate or declaration of their marriage, including the facts concerning marriages required by law, and for every neglect they shall forfeit ten dollars.

SECTION 13. No magistrate or minister shall solemnize a marriage, having reasonable cause to suppose either of the parties to be under the age mentioned in section nine, without the consent of the parent or guardian having the custody of the minor, if there is any in the State competent to act.

SECTION 14. Marriages may be solemnized by a justice of the peace in the county for which he is appointed, when either of the parties resides in the same county; and throughout the State by any minister of the gospel ordained according to the usage of his denomination, who resides within the State and continues to perform the functions of his office; but all marriages shall be solemnized in the city or town in which the person solemnizing them resides, or in which one or both of the persons to be married reside.

SECTION 15. Marriages among the people called Friends or Quakers may be solemnized in the manner heretofore used and practised in their societies.

SECTION 16. Every justice of the peace, minister, and clerk, or keeper of the records of the meeting wherein any marriages among the Friends or Quakers are solemnized, shall make a record of each marriage solemnized before him, together with all facts relating to the marriage required by law to be recorded. He shall also between the first and tenth days of each month return a copy of the record for the month next preceding, to the clerk or registrar of the city or town in which the marriage was solemnized, and shall when neither of the parties to a marriage resides in the city or town in which the marriage is solemnized, return a copy of the record of such marriage to the clerk or registrar of the city or town in which one or both parties reside. All marriages so returned shall be recorded by the clerk or registrar.

SECTION 17. Every person neglecting to make the returns required by the preceding section, shall forfeit for each neglect not less than twenty nor more than one hundred dollars.

SECTION 18. A justice of the peace or minister who joins persons in marriage contrary to the provisions of this chapter, knowing that the marriage is not duly authorized, shall forfeit not less than fifty nor more than one hundred dollars.

SECTION 19. Whoever undertakes to join persons in marriage knowing that he is not authorized so to do, shall be imprisoned in the jail or confined to hard labor for a term not exceeding six months, or pay a fine of not less than fifty nor more than two hundred dollars.

SECTION 20. [Unintentional informality does not invalidate marriage in other respects lawful.]

SECTION 21. The record of a marriage, made and kept as prescribed by law by the person before whom the marriage is solemnized, or by the clerk or registrar of any city or town, or a copy of such

record duly certified, shall be received in all courts and places as presumptive evidence of such marriage.

SECTION 22. [Admission of respondent, general repute, &c., competent evidence to prove the fact of marriage.]

SECTION 23. [Marriage in foreign countries by a consul or diplomatic agent valid, and certificate of such consul or agent presumptive evidence thereof.]

[General Statutes — Chapter 29.]
OF THE PUBLIC RECORDS.

SECTION 10. [County, city, and town records and files may be inspected and copied.]

SECTION 13. [Penalties; for altering or mutilating any record, paper, or written document, a sum not exceeding fifty dollars, — for wrongfully detaining records, and other documents, fifty dollars.]

[General Statutes — Section 1 of Chapter 174.]
SENTENCE WHEN NO PUNISHMENT IS PROVIDED.

SECTION 1. In cases of legal conviction, where no punishment is provided by statute, the court shall award such sentence as is conformable to the common usage and practice in this State, according to the nature of the offence, and not repugnant to the constitution.

[Chapter 138.]
AN ACT CONCERNING THE REGISTRY AND RETURN OF MARRIAGES,
BIRTHS, AND DEATHS.

SECTION 1. The clerk of each city and town (except in such cities and towns as choose a registrar, under the eleventh section of the twenty-first chapter of the General Statutes, in which cases the provisions of this act shall apply to the registrar), for receiving or obtaining, recording, indexing, and returning the facts relating to marriages, births, and deaths occurring therein, shall be entitled to receive therefrom the sums following, viz. : for each marriage, fifteen cents ; for each birth, thirty cents ; for each death returned to him by the persons specified in sections two, three, and four of chapter twenty-one of the General Statutes, twenty cents for each of the first twenty entries, and ten cents for each subsequent entry ; for each death not so returned but by him obtained and recorded, twenty cents.

SECTION 2. Chapter ninety-six of the acts of the year eighteen hundred and sixty-five, and so much of section seven of the twenty-first chapter of the General Statutes as is inconsistent herewith, are hereby repealed.

SECTION 3. This act shall take effect upon its passage.

[Approved April 7, 1866.]

[Chapter 58.]

AN ACT RELATING TO THE MARRIAGE OF NON-RESIDENT PARTIES.

SECTION 1. Persons living without the Commonwealth and intending to be joined in marriage within the Commonwealth, shall, before their marriage, cause notice of their intention to be entered in the office of the clerk or registrar of the city or town in which they propose to have the marriage solemnized; and no marriage between such parties shall be solemnized until they have delivered to the justice of the peace or minister, in whose presence the marriage is to be contracted, a certificate from such clerk or registrar, specifying the time when notice of the intention of marriage was entered with him, together with all facts in relation to the marriage required by law to be ascertained and recorded, except those respecting the person by whom the marriage is to be solemnized.

SECTION 2. Marriages may be solemnized by a justice of the peace in the county for which he is appointed.

SECTION 3. A justice of the peace or minister who joins persons in marriage contrary to the provisions of this act shall forfeit not less than fifty nor more than one hundred dollars.

[*Approved March 11, 1867.*]

[Chapter 145.]

AN ACT FIXING THE FEES OF CLERKS AND REGISTRARS FOR THE REGISTRY AND RETURN OF BIRTHS.

SECTION 1. The clerk or registrar of a city or town shall receive the sum of fifty cents for receiving or obtaining, recording, indexing, and returning the facts relating to each birth; but a city or town containing more than ten thousand inhabitants may limit the aggregate compensation allowed to their clerk or registrar.

SECTION 2. This act shall take effect upon its passage.

[*Approved April 2, 1873.*]

[Chapter 202.]

AN ACT RELATING TO THE FEES OF SEXTONS AND OTHERS.

SECTION 1. Section four of chapter twenty-one of the General Statutes is amended by striking out the word "ten" after the words "fee of," and inserting instead thereof, the words "twenty-five."

SECTION 2. This act shall take effect upon its passage.

[*Approved April 16, 1873.*]

[Chapter 341.]

AN ACT CONCERNING FEES OF TOWN CLERKS FOR OBTAINING AND RECORDING THE FACTS RELATING TO DEATHS.

Chapter one hundred and thirty-eight of the acts of the year eighteen hundred and sixty-six is amended by striking out the words "twenty cents," at the close of section one, and substituting therefor the words "thirty-five cents."

[*Approved June 6, 1873.*]

[Chapter 21.]

AN ACT TO AMEND SECTION FIVE OF CHAPTER TWENTY-ONE OF THE GENERAL STATUTES, IN RELATION TO THE REGISTRY AND RETURN OF BIRTHS, MARRIAGES, AND DEATHS.

SECTION 1. Section five of chapter twenty-one of the General Statutes is hereby amended by striking out the word "February" in the second line of said section, and inserting in place thereof the word "March."

SECTION 2. This act shall take effect upon its passage.

[*Approved February 19, 1875.*

[Chapter 341.]

AN ACT TO PROVIDE FOR THE MORE ACCURATE REGISTRATION OF VITAL STATISTICS.

SECTION 1. No human body shall be buried, or removed from any city or town, until a proper certificate has been given by the clerk or local registrar of statistics to the undertaker or sexton, or person performing the burial, or removing the body. This certificate shall state that the facts required by chapter twenty-one of the General Statutes have been returned and recorded; and no clerk or local registrar shall give such certificate or burial permit until the certificate of the cause of death has been obtained from the physician, if any, in attendance at the last sickness of the deceased, and placed in the hands of said clerk or local registrar: *provided* that, in those cities and towns where local boards of health have been established, the certificate of the cause of death shall be approved by such board before a permit to bury is given by the registrar or clerk.

Upon application, the chairman of the local board of health, or any physician employed by any city or town for such purpose, shall sign the certificate of the cause of death to the best of his knowledge and belief, if there has been no physician in attendance. He shall also sign such certificate, upon application, in case of death by dangerous contagious disease, or in any other event when the certificate of the attending physician cannot for good and sufficient reasons be early enough obtained.

In case of death by violence, the medical examiner attending shall furnish the requisite medical certificate.

Any person violating the provisions of this section shall be punished by a fine not exceeding twenty-five dollars.

SECTION 2. This act shall take effect on the first day of May, in the year eighteen hundred and seventy-eight; and all acts and parts of acts inconsistent herewith are hereby repealed.

[*Approved April 23, 1878.*

STATISTICAL NOSOLOGY.

ADOPTED FOR REGISTRATION IN MASSACHUSETTS.

The following plan of a Nomenclature and Classification of Diseases does not essentially differ from that authorized by the Registrar-General of England, to be used in the preparation of the "Weekly Return of Births and Deaths in London;" and is also, with slight modifications, identical with that embodied in the report drawn up by William Farr, Esq., M.D., of London, for the consideration of the International Statistical Congress which met at Paris in September, 1855; which report was printed in the Appendix to the Sixteenth Registration Report of the Registrar-General, England.

[NOTE. — This page and those that follow contain two lists of causes of death. The first — that on the left side — may be called the *TABULAR LIST*, and comprises all the heads which it is proposed to admit into the complete tables (IX. and X.), and under which ALL deaths, from whatever cause, are finally distributed. It represents those diseases which, under the same terms, or terms strictly synonymous with them, are found in practice to occur most frequently.

The *SUPPLEMENTAL LIST* is *subordinate* to the first, and contains the principal *special* diseases which it may be considered desirable to note. The figures in this list indicate the corresponding numbers of the tabular list under which such diseases are ultimately arranged.

Table VIII. includes both the Tabular and Supplemental lists; Tables IX. and X. the Tabular list only.]

CAUSES OF DEATH.

TABULAR LIST.	SUPPLEMENTAL LIST.
CLASS I. — ZYMOTIC DISEASES.	<i>Of Diseases of Special Character (or synonyms).</i>
ORDER I. — <i>Miasmatic.</i>	
I. 1. — 1. Smallpox 2. Measles 3. Scarlatina 4. Diphtheria 5. Quinsy 6. Croup 7. Whooping Cough 8. Typhoid (and Infantile Fever) 9. Erysipelas 10. Metria (Puerperal Fever) 11. Carbuncle 12. Influenza 13. Dysentery 14. Diarrhœa 15. Cholera Infantum 16. Cholera 17. Ague 18. Remittent Fever 19. Rheumatism 20. Cerebro-spinal Meningitis	I. 1.—1. Vaccination not stated. Smallpox (second attack). After vaccination. Erysipelas, &c., after vaccination. Chickenpox. Miliaria. 3. Angina maligna. 5. Mumps. Tonsillitis. 8. Typhus fever. 9. Phlebitis. Pyæmia. Hospital gangrene. Erythema. 10. Childbed fever. 11. Anthrax. 17. Intermittent fever. 18. Yellow fever. 19. Rheumatism, with pericarditis, or disease of heart. 20. "Spotted fever."

CAUSES OF DEATH — (CONTINUED).

TABULAR LIST.

CLASS I. — (Continued.)

ORDER 2. — *Enthetic.*

- I. 2. — 1. Syphilis
 2. Stricture of Urethra
 3. Hydrophobia
 4. Glanders

ORDER 3. — *Dietic.*

- I. 3. — 1. Privation
 2. Purpura and Scurvy
 3. Delirium Tremens } (Alcoholism).
 4. Intemperance }

ORDER 4. — *Parasitic.*

- I. 4. — 1. Thrush
 2. Worms, &c.

CLASS II. — CONSTITUTIONAL DISEASES.

ORDER 1. — *Diathetic.*

- II. 1. — 1. Gout
 2. Dropsy and Anæmia
 3. Cancer
 4. Noma (or Canker)
 5. Mortification

ORDER 2. — *Tubercular.*

- II. 2. — 1. Scrofula
 2. Tabes Mesenterica
 3. Phthisis (Consumption of Lungs)
 4. Hydrocephalus

CLASS III. — LOCAL DISEASES.

ORDER 1. — *Nervous System.*

- III. 1. — 1. Cephalitis
 2. Apoplexy
 3. Paralysis
 4. Insanity
 5. Chorea
 6. Epilepsy
 7. Tetanus
 8. Convulsions
 9. Brain Diseases,* &c.

SUPPLEMENTAL LIST.

- I. 2. — 1. Gonorrhœa.
 Purulent ophthalmia.
 4. Malignant pustule.
 Necrosis (usually from dis-
 section wounds).
 Septicæmia.

- I. 3. — 1. Want of breast milk.
 2. Rickets.
 Bronchocele.

- I. 4. — 2. Porrigo.
 Scabies.
 Tape-worm.
 Hydatids.
 Trichiniasis.

- II. 1. — 2. Leucocythæmia.
 3. Soft cancer.
 Epithelioma.
 Sweep's cancer.
 Melanosis.
 Other kinds of cancer.
 Polypus (part not stated).
 Lupus.
 5. Bed-sore.
 Dry gangrene.

- II. 2. — 1. Psoas (lumbar) abscess.
 White swelling.
 Cretinism.
 2. Tubercular peritonitis.
 3. Hæmoptysis.
 4. Tubercular meningitis.

- III. 1. — 1. Phrenitis. Myelitis.
 4. Monomania.
 Fright.
 Grief.
 Melancholia.
 Rage.
 6. Hysteria. "Fits."
 8. Laryngismus stridulus.
 9. Neuralgia.
 Ophthalmia.
 Otitis.
 Dis. of spinal nerve.
 Necrencephalus, — Ita-
 mollissement.

* Other diseases of the brain, or diseases of the nervous system, *not otherwise distinguished*, are referred to this head. *Mutatis mutandis*, the note applies to the corresponding heads in other orders of this class.

- V. 5. — 1. Hanging

Sudden, cause unascertained

NOTE. — Cases of "infantile fever" are classed with typhoid, relapsing, and other continued fevers, under one name, "typhoid fever;" of "rheumatic fever," with "rheumatism;" of "hemorrhage," and "abscess," with the diseases of the part affected (if that is stated, as it should always be, in the return). As "stricture of the urethra" is almost invariably the result of gonorrhoea, it is classed as 1. 2.—2. All cases of death returned "unknown," or of which the cause is not stated, and cases of "tumor," "inflammation," or "hemorrhage," of which the locality or part affected is not mentioned, are classed as unknown, and therefore not included in the foregoing tables of specified causes.

* Manner stated.

† Manner not stated; return, therefore, imperfect.
